journey planner 12 driving assistance systems

Renault Zoe asserts its style with even more character. To the smooth lines that have made it so successful, Zoe adds a new 100% LED C-shaped brand light, front fog lights and a more distinctive grille. The rear lights gain character with an LED light beam that expands the bodywork.

- 1. height- and reach-adjustable steering wheel
- 2. upholstery made of recycled material

# a bubble of well-being

Ultra-connected to the world that surrounds it, Renault Zoe is first and foremost connected to you. As soon as you approach, it opens the doors with keyless entry to a world that combines technology and simplicity. A true cocoon, the passenger compartment reinvents new comfort standards with upholstery and trims covered with 100% recycled textile\*, and extreme care given to the phonic isolation. The digital instrument panel is further enhanced in terms of overall ergonomics and given a modern look with its new 10" screen. It puts all the information you need right in front of your eyes while you are driving, while the new steering wheel and functional controls allow you to manage your vehicle with just your fingertips.

\* the equilibre finish is equipped with 100% recycled fabric upholstery, the techno finish upholstery combines this fabric with leatherette.

- 1. 'e-shifter' electronic gear lever that switches from one driving mode to another
- 2. 10" screen with the main driving assistance systems and all the specific electric vehicle settings

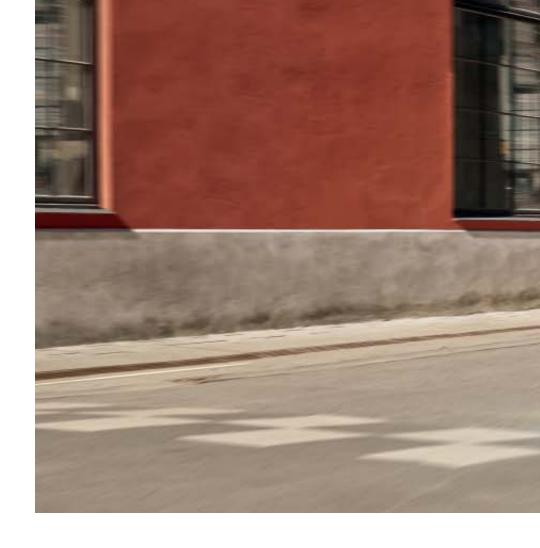

# go further with more freedom

With a driving range of up to 395 km WLTP\*, Renault Zoe offers the freedom you need. Enjoy a unique, lively and flexible driving experience thanks to the new R135 100 KW electric engine (135 hp). The top speed of 140km/h allows you to overtake with peace of mind. To further increase the driving range, switch to regenerative braking mode. When you activate mode B, the battery recovers energy and charges itself as soon as you take your foot off the accelerator. This more intense braking mode makes it easier to drive by reducing use of the brake pedal.

\*WLTP (Worldwide Harmonised Light Vehicle Test Procedures): this new protocol provides results much closer to those found in daily use compared with the NEDC protocol.

# 395 km range

With Renault Zoe E-Tech 100% electric, the emphasis is on next-generation performance. Committed to pushing back the boundaries of electromobility right from the outset, the iconic trailblazing company is taking things yet further: improved air turbulence management, energy recovery, efficient driving mode. Its new platform houses a 52 kWh battery for a range of up to 395 km.<sup>(1)</sup>

#### aerodynamic design

Renault Zoe's front end panel has two air inlets which channel flow to reduce turbulence. This technology, combined with a redesigned body under-structure, makes the vehicle as aerodynamic as possible.

#### regenerative braking

With Renault Zoe, the energy produced when decelerating or every time the brake is used recharges your battery. This can add up to 10% more range in urban environments.

#### eco mode

In urban environments, switching to ecomode further optimises the battery's performance. Less sudden braking thanks to increased deceleration. That means more effective energy recovery and maximum range. driving ranges<sup>(1)</sup>

**52 kWh battery:** - up to 395 km

41 kWh battery:

- up to 300km

<sup>\*</sup>WLTP (Worldwide Harmonised Light Vehicle Test Procedures): this new protocol provides results much closer to those found in daily use compared with the NEDC protocol.

charging made easy You have continuous access to a broad range of customised solutions for charging at home, at work, on the road or elsewhere. Renault Zoe is delivered with a mode-3 type cable that can be used with a domestic<sup>(1)</sup> or a public charging station. With the **My Renault** application, check your battery's charge level from your mobile.

#### charging at home, at work or elsewhere

Charge Renault Zoe easily on the domestic grid using a domestic charging station<sup>(1)</sup>, a reinforced domestic socket or a standard domestic socket<sup>(2)</sup>. With the **My Renault application**, check your driving range at any time, start your charging remotely or schedule it to start at off-peak times.

At home, **Mobilize Power Solutions** offers you the most needs-adapted range of charging stations and sockets, and helps you with installation and maintenance.

#### on-street charging

An evening at the cinema? Going to the supermarket?

With the My Renault application, locate the public charging points closest to your destination.

For longer journeys, get up to 150 km of range in 30 minutes at a rapid charging point.

Using your **Mobilize charge pass**, available in your **My Renault application**, access the largest charging network in Europe.

<sup>(1)</sup> **Mobilize Power Solutions** offers. For more information about Mobilize services, go to the Mobilize services page. For more information about recharging, call 0 800 12 34 56 (to be localised by countries). (2) only for occasional use. (3) maximum power and charging times are based on moderate weather conditions (20 °C).

- main menu linking to navigation, radio, music, telephone system, applications, etc.
   3D navigation interface with Google address search

# an intuitive interface

In the cockpit, you'll find a vertical, high-resolution 9.3" touch screen on the centre console. Directly connected to TomTom services, on-board navigation gives you a multitude of information in real time: traffic density, danger areas, weather, location and availability of charging points, etc. Along with the 10" digital instrument panel, you'll enjoy one of the largest display surfaces in its category.

- smartphone replication compatible with Android Auto™ and Apple CarPlay™
   induction charger
   My Renault application

# navigate as you feel

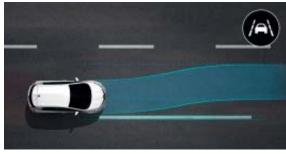

Thanks to the new easy link multimedia system and its large 9.3" screen compatible with Android Auto™ and Apple CarPlay™, listen to your playlists, navigate through your favourite applications and make calls in complete safety. Charge your smartphone easily with the induction charger. Take advantage of the My Renault application that makes your life easier. With this application you can find where your Zoe is parked immediately. Prepare your journeys and send your destination to your Zoe – its navigation system will calculate your route. On the road, locate the charging points available nearby or at your destination. Once parked, open the 'last kilometre route' service on your smartphone and let yourself be guided step by step to your final destination.

Android Auto $^{TM}$  is a trademark of Google Inc.; Apple CarPlay $^{TM}$  is a trademark of Apple Inc.

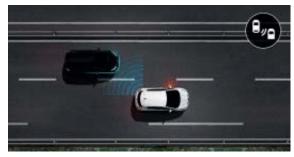

#### speeding alert

Be alerted if the speed limit is exceeded. The cameraequipped system gathers, compares and analyses signalling data with information provided by mapping and keeps you informed via the instrument panel. You can also record the maximum speed detected to adjust your speed limiter.

#### lane keeping assist

Active between 70 km/h and 140 km/h, this system corrects the steering wheel to bring the vehicle back into lane if you ever cross a continuous or broken line without activating your indicator.

#### blind spot warning

Active above 15 km/h, this system uses warning lights to alert you to the presence of vehicles that are not visible in your field of vision.

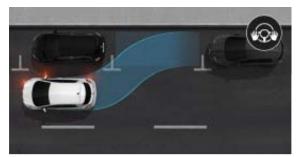

#### front and rear parking sensors

Radar sensors facilitate your manoeuvres by warning you with sound and visual signals of the proximity of obstacles in front of and behind you.

#### side parking sensors

Radar sensors facilitate your manoeuvres by warning you with sound and visual signals of the proximity of obstacles in front of and behind you.

#### hands-free parking

This system makes it easier to park. Your vehicle handles both finding a parking spot and steering. All you need to manage is the speed.

# 12 driving assistance systems

#### regenerative braking

Regenerative braking allows the battery to charge by recovering energy as soon as you take your foot off the accelerator. In mode B, this braking is more intense and allows you to drive in a more economical way that requires less use of the brake pedal.

#### electronic stability control

The system allows you to maintain control of the vehicle in critical driving situations: obstacles or loss of grip on a bend.

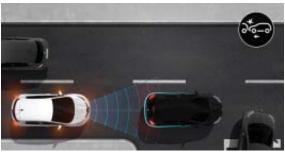

#### cruise control/speed limiter

Control your speed with the buttons on the steering wheel and set a maximum speed to comply with traffic regulations and avoid any infractions.

#### lane departure warning

The system informs the driver of unintended crossings of a solid or broken line, using a camera located on the windscreen, behind the rear-view mirror.

#### automatic emergency braking

Active up to 80 km/h, it detects vehicles approaching head-on and stops yours in the event of danger. Driving in the city has never been so safe, day or night.

#### hill start assist

Combined with ESC, hill start assist maintains brake pressure automatically for 2 seconds to give you time to lift your foot from the brake pedal and press the accelerator. The system activates when the slope exceeds 3%.

### accessories

1. False floor for cable storage and stainless steel boot sill.
Fully integrated into the boot shape, the false floor offers several compartments designed to hold two charging cables.
One compartment is specifically for protecting the Bose® subwoofer. No more cables lying around or dirt on the bottom of the boot:

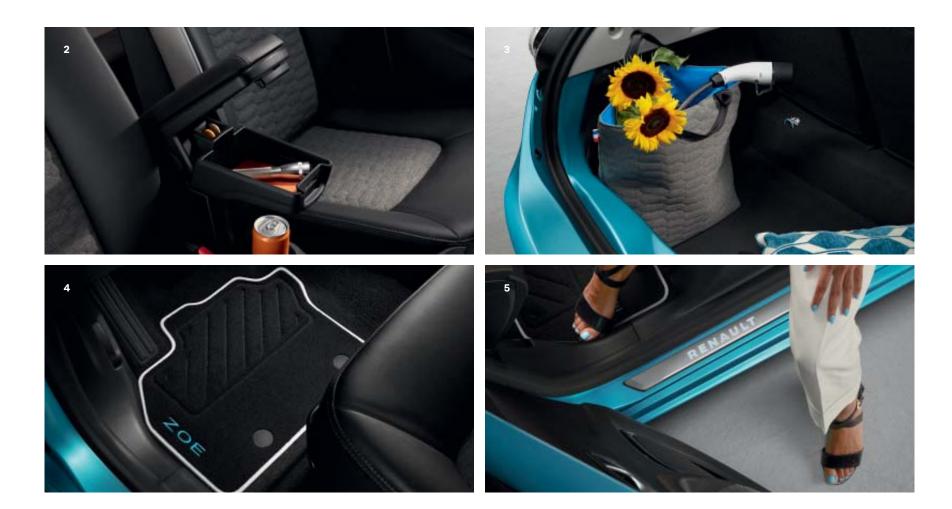

the false floor raises the bottom of your boot, making it easier to access the objects inside it. The removable floor is hinged and features a handle to make accessing the contents easier. It can also hold small objects (the safety kit, for example) if just one cable is stored or if there is no Bose® subwoofer.

- Front armrest. This feature
  improves driving comfort and
  offers additional storage space.
  Room for storing coins (e.g. tokens
  and change). Available in three
  finishes: black fabric, Recytex
  fabric, black leatherette.
- 3. Cable storage bag made of recycled fabric. Highly useful, you can use it to store your cables, your shopping or anything you like, keeping your boot neat and tidy. Easily washable interior. Made in France by disabled people as part of an initiative to integrate them into the workplace.
- 4. Premium textile floor mats.

  Premium mat with elegant finish.

  They provide full protection
  for the floor in the passenger
  compartment. Custom-made and
  specially designed for the vehicle,
  they are easily attached using two
  securing clips and don't interfere
  with the pedals. Easy to clean.
- 5. Illuminated door sills. Elegance and modernity whenever a door is opened. White time-delayed lighting on your sills turns heads day or night. Their aluminium-look finish, featuring a Renault logo, also protects the entrances to your vehicle. Sold in pairs.

(1) WLTP (Worldwide Harmonized Light Vehicle Test Procedures): this new protocol provides results much closer to those found in daily use compared to the NEDC protocol. (2) in WLTP certification, the value corresponds to the vehicle version that has obtained the most optimal value. (3) the size of the wheel rims may affect the vehicle's driving range. (4) the charging time and driving range recovered depend on the temperature, wear of the battery, power delivered by the charging point, your driving style and your charge level.

### glossary

#### E-Tech

100% electric, hybrid or rechargeable hybrid technology developed by Renault.

#### regenerative braking

Energy recovery system during braking, which increases the vehicle's driving range: whenever the vehicle slows down, part of its kinetic energy is converted into electricity. The battery recharges when the driver lifts their foot off the accelerator pedal or presses slightly on the brake pedal.

#### reinforced domestic socket

A home charging solution that is more efficient than a simple domestic socket. Allows for more powerful (3.2kW for a reinforced socket vs 2.3kW for a standard socket) and more secure charging (fitted with a differential circuit breaker).

#### domestic charging point

Delivers a much higher intensity than a standard domestic socket, for more efficient and faster charging. It enables safer home charging thanks to its systems for controlling charging and protecting against overvoltage.

#### flexi-charger

Charging cable that can be used to plug a car into a domestic power socket.

Designed for occasional home charging, the flexi-charger should preferably be plugged into an electrical socket connected to a specific earth connection.

#### mode 2

For domestic use, this cable is needed to charge an electric vehicle using conventional sockets.

#### mode 3

This cable is needed to recharge electric vehicles via a Wallbox or at public charging points.

#### useful capacity

Amount of energy contained in the battery that can be used by the vehicle. Value expressed in kilowatt hours (kWh).

#### kWh

Abbreviation for kilowatt hours. Unit of energy which corresponds to 1 kW of power consumed over one hour.

#### kW

Abbreviation for kilowatts. Unit used to measure the power of a vehicle's engine, whether it is electric or powered by an internal combustion engine. The kilowatt can also measure the direct current (DC) or alternative current (AC) charging power.

#### AC charge

Low to medium power AC charging (max. 22kW). This is the charging method most commonly found in homes or at most public charging points.

#### DC charge

Rapid direct current charging (50kW minimum). Requires a specific fast charging station, available only on the public network.

#### **My Renault**

QR code to be integrated by celluleedition.eol@ diadeis.com

ideis.com via Android

Renault application connected to your vehicle that may be downloaded to your phone from Google Play or the App Store. You can use it to locate nearby charging stations, find your vehicle, schedule charging and plan your journey in advance, as well as displaying remaining driving range and pre-setting the temperature of the passenger compartment.

# Mobilize: services designed to make your electric life easier

Enjoy a completely practical and fully efficient electrical experience: installation of a charging station in your home as soon as you purchase the vehicle, support services delivered via your mobile, card for accessing and paying for the use of European charging stations.

#### Mobilize power solutions, installation of home charging solutions

Order your home charging solution when you purchase your vehicle. Whether you are a tenant or a home-owner, whether you live in an apartment block or in a house, we have a solution that will meet your needs – with or without financing. Installed even before your car is delivered to you, this is the best way to start your electric life.

#### simplified purchasing process

Using an innovative tool, you enjoy a fixed price – with no additional costs – for the purchase and installation of your charging point. Thanks to geolocation, there's no need to make an on-site appointment – we can schedule a simple virtual visit with you so we can check that your electrical installation is in compliance. The order is made online, with signature and payment of the installment by SMS.

#### peace of mind

Before, during and after installation, our experts are available to help.

### With Mobilize Charge pass, easier location of charging points and payment

Charge your electric vehicle easily on the largest European network of public charging points. When you're on the go, immediately find out where the nearest available charging station is via the My Renault application, follow the route indicated and start charging with your pass.

#### pay with complete peace of mind

When your vehicle has finished charging, the amount to be paid is debited directly from the bank account associated with the Mobilize Charge Pass. With Mobilize Charge pass, you always have a convenient charging solution.

### Renault care service

We are always at your side to make life easier and save you time with the maintenance of your Renault: online quotes and appointments, fixed price packages, maintenance contracts, insurance and assistance, personalised My Renault programme... Take advantage of our simple and fast solutions tailored to your needs.

#### your first steps

All the information you need can be found:

- on our websites: our ranges of products/services/finance, book a test, etc.
- in our dealership network: meet our sales and technical teams.

#### Renault care service, 100% cover

Guard against the unexpected with Renault extended warranties, insurance policies and assistance, which are always there for you.

#### My Renault: your vehicle's connected application

View a record or reminder of maintenance dates, book an appointment at the dealership, view the e-guide and numerous video tutorials on the functions of your vehicle. Launch your vehicle's charging and air conditioning remotely and make your day-to-day mobility easier with five years of connected services included! And after each service at the Renault workshop, view your battery's capacity directly in the application.

#### Renault care service, worry-free maintenance

Our Renault care service maintenance contracts and fixed price packages offer you the benefits of a bespoke all-inclusive package.

#### maintained performance

Your Renault's electric battery is guaranteed for 8 years or 160,000 km with a minimum capacity of 70%. You will receive free assistance in the event of battery failure during its warranty period.

#### resale made easy

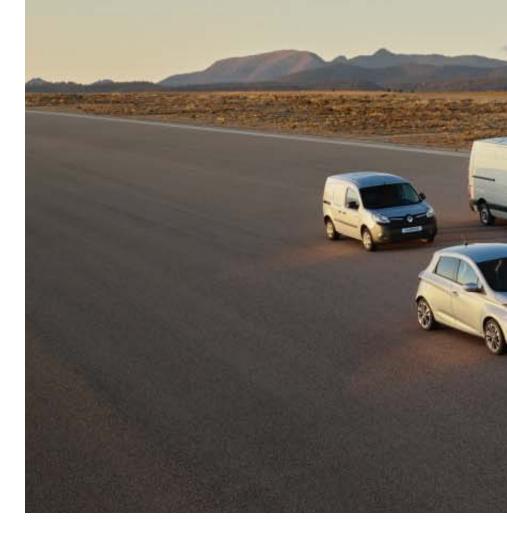

Resale is made easy: full sale of the vehicle, including battery. Beyond 8 years, Renault offers a battery warranty extension package for even more peace of mind.

#### accessories, your customised Renault

Our range of accessories contains everything you need to make your vehicle even more attractive, practical, comfortable and customised.

In France, more than one electric vehicle sold in two is a Renault, confirming the Group's pioneering approach, which has been committed to developing simpler, more pleasant and more comprehensive electric mobility for more than ten years. The Renaulation Plan, unveiled at the end of 2020, contributes to this via a whole range of vehicles and services.

As the leader on the European market with more than 300,000 electric vehicles sold, we are continually improving our offers: increasing the driving range, rolling out connected services, optimising the charging process and upgrading the engines and design.

For us, electric vehicles also have to respond to new methods of use: almost 10,000 electric vehicles are made available daily for carpooling in twenty cities in Europe. And we created the Mobilize brand around mobility, energy and data management services.

In the near future, with the emergence of 'smart grids', two-way charging will reinject current into the grid when there is high energy demand. Another step that places us fully in the circular economy, strengthening our mission to continue to be one of the pioneers of future mobility.

→ more than 300,000 Renault Zoe by the end of May 2021
